

PRODUCT: DUST-CLOTH MF

DUST-CLOTH™ MF

LOGO

The DUST-CLOTH MF is a micro fiber cleaning wipe used to wrap the DUST-WAND for the dislodging of welded-on dust and light oil removal on sensor filters.

DESCRIPTION

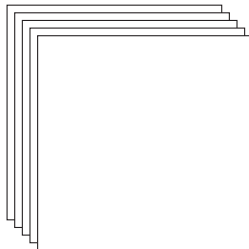

The DUST-CLOTH MF's are designed to be used with the DUST-WAND and ULTRA CLEAN in the removal of light oils and the dislodging of welded-on dust. They are manufactured and packaged within a cleanroom environment. The cloths are extra soft and tested not to scratch factory standard sensor filters. The micro fiber fabric is designed not to leave fibers behind after cleaning. They are thicker than the standard DUST-CLOTH's and are sized to fit the wands and clips properly.

- Micro Fiber wipes
- 99.999% clean
- Lint free
- 50 count, 3"x3" wipes
- Comes in zip lock bag
- Designed not to leave fibers
