

PRODUCT: DUST-WAND KIT

DUST-WAND™ KIT

LOGO

The DUST-WAND KIT is designed to dislodge welded-on dust and the removal of light oils from DSLR sensor filterers.

DESCRIPTION

The DUST-WAND KIT is the only spatula/wrap based kit that includes a wand for every CCD and CMOS sensor filter aspect ratio. It is also the only kit that uses a non-flammable, non-alcohol, non-water based cleaning liquid which has the fastest evaporation rate currently available. Another unique feature are the clips used to hold the cloth to the wand. The clips make it very easy for the user to fasten the cloths to the wand without the use of tape. The wands have been designed with a very thin profile to help aid in cleaning and sight path. Everything is contained within a dust tight travel case which makes packing very easy.

- This kit contains everything needed to do liquid sensor cleaning
- Comes with DUST-CLOTH wipes for DUST-WAND wrapping
- Uses the new and revolutionary ULTRA CLEAN liquid
- Comes with three sizes of DUST-WANDS
- Unique clips hold the DUST-CLOTH wrap tight to the DUST-WAND
- Dislodges welded-on dust and light oils
- Uses non-flammable, non-alcohol liquid that is airline safe
- Approved for ITO and Dichroic sensor filter coatings

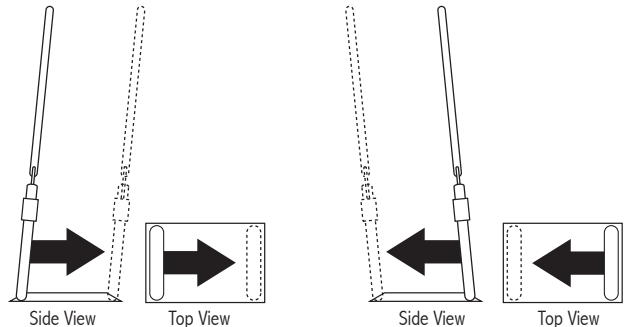

POINT OF DIFFERENCE

BULLET POINTS

CONTENTS

- STEP 1: Wrap DUST-CLOTH around a DUST-WAND that corresponds to the DSLR sensor aspect ratio.
- STEP 2: Secure the the DUST-CLOTH wrap to the DUST-WAND by using a clip.
- STEP 3: Apply ULTRA CLEAN Liquid to the cleaning end of the wrapped wand.
- STEP 4: Wipe sensor filter to remove welded on dust or light oils.
- STEP 5: Discard used DUST-CLOTH wrap and place all used items into case.
